

THE WELDING INSTITUTE
EASTERN COUNTIES BRANCH

Event: Lecture following AGM

Subject: The Naked UFO

By: Richard Vere-Compton

Venue: TWI, Granta Park, Great Abington CB21 6AL

Date: Wednesday 14 January 2015

Report by: J Weston, Hedges, Lodge Road, Walberswick, Suffolk IP18 6UP
Tel: 01502 722584, Email: weston559@btinternet.com

Richard-Vere-Compton gave a presentation that touched on the United States involvement with A.V.Roe of Canada and the building of a flying saucer. It was, he said, common knowledge that the U.S. government had spent millions of US dollars in the late 1940,s and early 1950,s with A.V. Rowe of Canada. The brief had been to build a circular aerofoil which would use the Cold Compressor Stage from one or more jet turbines to bleed air to produce lift and propulsion by utilising the Coandă effect.

In his talk he lay before us technology that was lost until he stumbled upon it in his quest to supply the most advanced engineering and scientific information to a White House lobbyist.

He discussed scientific developments in Germany in the period 1930-40 and engineering work by the allies at the same time. He described plasma and plasma effects and how they are and could be generated and effects that they have when associated with aerofoil (especially saucer shaped) sections.

His presentation was well supported by photos and diagrams and his turn of phrase kept his audience on their toes.

To get a full appreciation of us presentation you will need to read his book, "So You Want to Build the Naked UFO / Plasma Active Craft". ISBN 978184991
