Monday 29 January 2024**

**Address:
Chesterfield Special Cylinders,
Meadowhall Road,
Sheffield
S9 1BT**

There will be a sandwich buffet from 5:30pm. The tour will start at 6:00pm and last around one hour.

Who are Chesterfield Special Cylinders:

Chesterfield Special Cylinders has over 125 years of industry knowledge and expertise and is a world-leading provider of bespoke, high-pressure gas containment solutions and services. CSC's high-pressure cylinders are a critical component for a number of end applications, from high-pressure systems in naval submarines and surface vessels to oxygen cylinders in fighter jets, from the bulk storage of industrial gases to air pressure vessels in floating oil platform motion compensation systems and more recently for hydrogen transport refuelling and energy storage.

Our typical product range covers Type 1 cylinders with:

- Capacity Range: 0.5 litre to 3000 litre
- Working Pressures: 100 bar to 600 bar

As well as being a key supplier to the growing hydrogen sector (providing complete storage solutions and asset management) CSC are the partner of choice for many in the global energy, and defence sectors, with services including:

- Systems design solutions
- Cylinder manufacturing
- Cylinder re-testing & refurbishment

For more information on CSC, visit their website: www.chesterfieldcylinders.com
