

The Welding Institute Sheffield Branch

Technical Meeting and AGM

26th February 2024

The Road to Right First Time

by

Eur Ing Jackie Dixon C.Eng FWeldI

Hinkley Point C is the largest construction project that the UK has delivered over 30 years and is supporting the target of net zero emissions by 2050. At the end of 2023 we successfully completed the dome lift which has fully enclosed unit 1 reactor building containment allowing installation of the reactor pressure vessel during 2024. HPC is now moving in to the Mechanical, Electrical and HVAC phase of construction in addition to continuing with the civil engineering work. This presentation will give an overview of the construction to date, what is coming up and how we ensure that our welding quality is 'right first time'.

Jackie has worked in heavy engineering for over 25 years as a Materials and Welding Engineer in both manufacturing and the Supply Chain. She has worked on the Hinkley Point C project in Somerset for over 4 years in the Construction Technical Support team as a Welding Superintendent for EDF who are the Principal Contractor.

The Meeting will be a hybrid event with the option to attend in person or join via zoom. It will be followed by a short AGM for Sheffield Branch members.

Time: The meeting will start at 6pm and for those attending in person there will be a light buffet from 5.30pm.

Venue: TWI Yorkshire, Advanced Manufacturing Park, Catcliffe, Rotherham, S60 5TZ

All welcome- members and non-members.

Please Enrol for the meeting on The Welding Institute Sheffield Branch webpage.

This technical event qualifies for CPD points
